

# Swing Away Heat Press

## Model :DF680

**The DF680** Swing away heat Press swings away completely out of the way of the table ,this provides complete access to load and un-load materials and layout transfers.The heat platen is always face down,and regardless of the height of the product being pressed,it is always pressed evenly & level.The design of this swing away press combines a heavy duty solid steel industrial grade pressing farmework with accurate and easy to use electronics.This provides the operator with the best possible features and equipment needed for todays various digital print and heat transfer applications.The controller utilizes an easy to read and operate LCD display to show time and tempreture simitanuously,and the tempreture read out is accurate within +2c .And has an alert to prompt the operator when to release the press when the required time has elapsed..
