

Spray Adhesive Product code: SP-ADH 302

Has been formulated for today's environment, is Non wrinkling, fast drying, colourless and can be either permanent or repositionable. It is ideal for the placement of embroidery applique, it will bond textile fabrics, paper, cardboard, felt, PVC foils, wood, leather, plastic rubber foams and cork. The diffuser has been designed to avoid over spraying, it sticks evenly and won't clog up your needles or attract fluff if applied correctly.

How to use:

1. Shake can well before use and occasionally during use.
 2. Hold can approx 25cm from the surface to be sprayed and apply an even coat of adhesive.
 3. Note - After each use invert can and depress activator to clear the nozzle.
 4. When unfamiliar with the application of this product, sample testing is recommended.
- Permanent Bonding: Apply to both surfaces and allow to become tacky and press together.
- Temporary bonds: Spray to one surface only and allow to dry for approx 5 minutes then press together.
