

Tajima Spray Oil

TA -SP OIL

The Intelligent Machine **Lubricant**

This lubricant is a mixture of highly refined, transparent oils that have been Specially formulated for embroidery machinery and is OZONE Friendly !

Tajima Australia Embroidery Machine lubricant was developed specifically for Embroidery Machines. Features include an extension nozzle for accurate positioning of oil, and helps to prevent over oiling and the saturation and staining of garments.

TA-SPOIL provides over 3000 applications per can, does not drip or run and stays where you spray it. Great for the use on Embroidery machine Rotary hooks, Needle Bars, Driver parts Bearings and Trimming parts.

How to use

1. Place Nozzle onto can.
2. Place the nozzle into the designated oiling points on your machine. Tajima machines have a "RED" dot marked on your machine that makes identifying oiling point easy!
3. Press down and Spray for around ½ a second.

Please note that Machine Manufacturers will recommend the Oiling Frequency generally in your Machine Manual or discuss with your Technician .
