

# Wash Away

Tajima Wash Away stabilizer is ideal for such projects as lace work and appliqués, providing support and stability during embroidery. Wash Away is a non-woven fibre style stabilizer, both strong and soft, and can be embroidered with or without fabric. It is then easily dissolved completely in warm water, giving you a beautiful Lace or embroidery piece.

## How to use

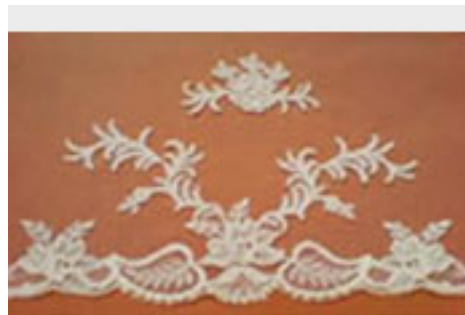

1. Place Tajima Wash away under the desired fabric you wish to use.
2. Free Hand Embroiderers should always ensure that the stitches are always connected so that the design does not fall apart after the embroidery backing has been rinsed out.
3. Once the design is complete, remove any excess backing, then simply rinse away in warm water.

Tajima Wash Away can be used on sheer fabrics such as organza, tulle, silk or nylon, and is perfect for freestanding lace designs.

Available in the following

- WS501- (50cm x 10mt)
- WS50100 (50cm x 100mt)

\*This will protect your embroidery backing from dirt, damp and dehydration.
