

Badgeio Iron On Glue

Tajima BADGEIO is a permanent double sided fusible film with a paper backing. This transfer film is excellent for attaching Badges, Applique, lettering, without stitching. Once applied, it is machine washable and dry cleanable. It creates a permanent bond between fabric surfaces without sewing.

To use: Place the BADGEIO over the under side of the Badge or Applique. Cut out the BADGEIO film and iron the non-wax paper side to the bottom of your patch or applique using an iron temperature of 260F. Once cooled, remove the release paper from the other side of the film. Now you have a patch or applique that is ready to be ironed onto a garment. Unlike other products, this is strong and permanent.

Eliminates the need for water-activated adhesive stabilizers, spray adhesives, or stitching.

- Wax paper backing for easy mess free fusing to applique and patches
 - Permanent & Strong
 - No Stitching Needed
- Fusible on both sides making this product stronger than competing peel and stick products
